Career Objective

Full Stack Developer (React.js, React Native, Ruby on Rails) with 1.5+ years of experience building and deploying scalable, production-grade web and mobile applications. Proven success in developing a public e-commerce app with 3,000+ downloads and delivering end-to-end modules including dashboards, workflows, and backend APIs

Skills

- **Frontend:** Typescript,Next.jsReact.js, React Native, Expo, TailwindCSS, Bootstrap,Material UI (MUI)
- **Backend:** Ruby on Rails, Node.js, Flask
- **Mobile:** React Native, Flutter
- **Databases:** MySQL, MongoDB, Firebase
- **DevOps & Tools:** Linux Server Deployment, CI/CD (GitHub Actions), Git, Postman, Jira, Android Studio
- **Other:** API Integration, Authentication (JWT), Payment Gateway Integration

Professional Experience

UniteGrid Infocomm — Full Stack Developer (Mar 2025 – Nov 2025)

- Built and shipped the public e-commerce mobile app **Zetahub** (React Native, Rails) achieving **3,000+** downloads, enabling seamless user purchase journeys.
- Developed an Admin Dashboard using React.js + Rails APIs for complete quick commerce workflow management (orders, inventory, delivery).
- Built responsive and accessible user interfaces using Material UI (MUI), leveraging reusable components, theming, and layout systems.
- Delivered full e-commerce module: product listings, order placement, processing, fulfillment, delivery tracking, and payments.
- Built and deployed multiple cross-platform apps (Retailer, Warehouse, Delivery, Quick Commerce) used by operational staff daily.
- Integrated payment gateways, maps APIs, and media rendering pipelines.
- Deployed & maintained production Linux servers, handled configurations, migrations, and optimizations.

Intact Green Services — Associate Software engineer(Mar 2024 – Feb 2025)

- Tested full-stack EdTech platforms for stability, performance, and cross-device consistency.
- Designed and executed test cases for a multi-platform EdTech product. Collaborated with developers to ensure stable cross-device performance and documented defects using Jira

Projects

Crypto Screener / CryptoPulse

- Built and deployed a production-grade cryptocurrency analytics dashboard using Next.js and TypeScript.
- Integrated the **CoinGecko** API (demo version) to fetch real-time and historical cryptocurrency market data including prices, market capitalization, and volume.
- Implemented interactive candlestick and price charts using the TradingView charting library for enhanced technical analysis.
- Designed a fully responsive and accessible UI using Tailwind CSS and **shadcn/ui** components.
- Developed advanced features such as token search, pagination,filtering, and detailed asset views to improve data discoverability and user experience.
- Followed modern frontend best practices including component reusability, type safety, and API abstraction.
- Used Git for version control and collaborative development workflows.
- Deployed the application on **Vercel** with production-ready configuration.
