Career Objective

Full Stack and Mobile Developer with **2+ years** of professional experience building production-grade web and mobile applications using React.js, React Native, Next.js, Node.js, and Ruby on Rails. Experienced in developing scalable dashboards, e-commerce platforms, and mobile applications used by real users, including a public mobile app with 3,000+ downloads. Currently working as a **React Native Developer at Fixezy**, focused on building performant mobile applications and scalable frontend systems.

Skills

- **Frontend:** React.js, Next.js, TypeScript, JavaScript, React Native, Expo, TailwindCSS, Bootstrap
- **Backend:** Node.js, Express.js, Ruby on Rails, Flask.
- **Mobile:** React Native, Flutter.
- **Databases:** PostgreSQL, MySQL, MongoDB
- **DevOps & Tools:** Git, GitHub Actions (CI/CD), Linux Server Deployment, Android Studio
- **Other:** REST API Integration, JWT Authentication, Payment Gateway Integration

Professional Experience

React Native Developer (L2)

Fixezy | Feb 2026 – Present

- Working as a React Native developer contributing to mobile application development and feature implementation.
- Collaborating with product and engineering teams to build scalable and maintainable mobile solutions.
- Implementing UI components and integrating REST APIs for mobile application workflows.
- Participating in code reviews, debugging, and performance optimization of React Native applications.
- Following modern mobile development practices including modular architecture and reusable component design

Full Stack Developer

UniteGrid Infocomm | Mar 2025 – Nov 2025

- Built and deployed a **React Native e-commerce mobile application (Zetahub) with 3,000+ downloads**, enabling seamless product browsing, ordering, and payment workflows.
- Developed a **React.js admin dashboard integrated with Ruby on Rails APIs** for managing orders, inventory, delivery workflows, and operational analytics.
- Designed and implemented **multiple operational mobile applications** (Retailer, Warehouse, Delivery) used daily by internal teams to manage quick-commerce logistics.
- Integrated **payment gateways, maps APIs, and media services** to support real-time order processing and delivery tracking.
- Managed **Linux production deployments**, handling server configuration, database migrations, and performance optimization.

Associate Software engineer

Intact Green Services | Mar 2024 – Feb 2025

- Performed **end-to-end testing of full-stack EdTech platforms** to ensure performance, reliability, and cross-device compatibility.
- Designed and executed **test scenarios for web and mobile applications**, identifying defects and improving product stability.
- Conducted **API testing and automation scripts** for migration validation and regression checks.
- Collaborated with developers and product teams using **Jira** to track issues and improve release quality.

Freelance Experience

Freelance-Full stack developer | Jan 2026- March 2026

- Delivered a **production-ready full-stack web application** using **Next.js, Node.js, and MySQL** supporting real-time service booking workflows.
- Built responsive frontend interfaces with **performance optimization and SEO considerations**.
- Developed backend APIs and database schema to manage **users, bookings, and operational workflows**.
- Deployed and maintained the live system, handling **bug fixes, feature enhancements, and production stability**.
- **Live URL:** [Instabook](#)

Yoga Center Admin Dashboard(In Progress)

- Developing a **comprehensive operations dashboard** using **React (Vite) and TailwindCSS**, implementing pixel-accurate UI from Figma designs.
- Implemented modules for **user management, trainer management, center management, and financial analytics dashboards**.
- Designing backend services using **Node.js (Express) and PostgreSQL** to manage memberships, scheduling, and financial tracking.
- Building REST APIs and database schemas to support **administrative workflows and reporting features**.

Projects

Crypto Screener / CryptoPulse(Jan 2026)

- Built a **cryptocurrency analytics dashboard** using **Next.js and TypeScript** for real-time market insights.
- Integrated **CoinGecko API** to fetch live and historical cryptocurrency data including price, volume, and market capitalization.
- Implemented **TradingView candlestick charts** to support advanced technical analysis.
- Developed features such as **token search, filtering, pagination, and detailed asset views**.
- Designed responsive UI using **TailwindCSS and modern component architecture**, deployed on **Vercel**.
